

Gerome's Magical Garden

Gerome's Magical Garden is a unique children's gardening kits that contains EVERYTHING but the dirt AND a great story, set of figurine characters, coloring, puzzles and sticker activities to keep the children engaged and active over the growing season. The children plant, grow, harvest and hopefully eat: radishes, lettuce, spinach, beans, carrots and peas. READ, PLANT, GROW.

The most important element in the design after safety is FUN for the kids. Gerome, Terra, Freddie and all the vegetables come to life in (40) page hand illustrated book and the figurines can be moved around the plants as they grow. As they progress through the garden project with Gerome they learn about composting, eco-wise gardening, worms, frogs, the calendar, the plants, bees and are challenged with math and word puzzles.

The product was designed, authored and illustrated in the Chippewa Valley and 60% of the product is made in WI and 90% of the product is made in the United States. Gerome's Magical Garden meets or exceeds all the Consumer Product Safety Commission standards for children's toys. Enchanting Gnome Knowledge is located in Elk Mound WI where Greg Raleigh the designer/creator lives. Edna Perkins, Author lives in Cornell and Kris Gausman the Illustrator lives South of Eau Claire.

The three containers are designed to fit on a deck, patio, three-season room or near a window and can be grown indoors or outdoors. The kit is reusable, comes with 2-3 years of seeds and with a full set of instructions and a Quick Start Guide.
