

Beneficial Pond Bacteria

Aquascape Beneficial Bacteria contains 8 pure strains of concentrated beneficial bacteria, including PSB bacteria and enzymes. It is 100% dissolvable and will not cloud your water.

This combination of natural cleaners helps to maintain a strong biological balance in your pond.

Aquascape Beneficial Bacteria maintains a strong biological balance providing clean, clear and healthy water conditions.

Some of it's benefits are:

- Keeps pond water clean and clear
- Maintains a balanced ecosystem
- Reduces pond maintenance
- Safe for fish, plants or animals that may drink pond water
- Contains 8 strains of bacteria
- Contains Photo Synthetic Bacteria (PSB)
- 1 billion CFU per gram potency

Instructions for use

How Much: One scoop treats up to 1,000 gallons of pond water.

How Often: For new ponds or after winter, treat daily for the first 10 days. After the pond has matured use a maintenance dose of 1 scoop per 1,000 gallons weekly.

How To: Add to the area in the pond with the most circulation or directly into the pond skimmer opening.

Why: Adding beneficial bacteria is one of the most important things you can do for your pond. Don't wait until you have a problem to treat the pond. Prevent problems before they happen with a simple weekly maintenance dose of Aquascape Beneficial Bacteria.

Please Note: Water temperature should be a minimum of 50°F. Keep out of reach of children. Store at room temperature.
