

What our customers say...

I've been a long time customer of the Winter Greenhouse and every visit I would languish in their shade garden. I worked with Kelly at the Greenhouse to recreate that look in my wooded back yard. Kelly did a site visit and then a computer drawing so that I could visualize the completed garden and that was a very helpful step. The crew arrived exactly the day they said they would and the job was completed on time and on budget. They were attentive to what we wanted to achieve and respectful of how much we were able to spend on the project. We're looking forward to enjoy our woodland garden!

Bev Dukerschein - Artisans, Glen Flora

We contacted the Winter Greenhouse and requested that they put together a landscape plan that we could do in phases over the next couple of years. After seeing how great the new plantings made our home look, we released them to start the entire project the first week of September. Kelly and her crew were extremely competent, diligent and a pleasure to work with on our project. I would recommend them highly to anyone considering doing any kind of landscaping.

Tom & Michele Koehler - Moose Lake

Dave and I just wanted to say thank you for the incredible work you did with our landscape and gardens. We never imagined our property could look so beautiful! Your dedication, enthusiasm & attention to every detail was beyond our expectations. We have magnificent color spring through fall & winter interest for us and the birds too! You folks are truly talented and passionate about what you do, we would recommend you to anyone! Thanks again...we couldn't be happier!

Vicki & Dave Shaffer - Stone Lake

We cannot say enough about the services we received from the Winter Greenhouse Staff and workers. They truly love what they do and their completed projects really reflect this. We were dealing with a time crunch and a budget to get everything prepared for our sons graduation party. We spoke with the Greenhouse Staff and they were able to fit us into their schedule and completed our projects with 2 days to spare and below budget. They were prompt, reliable and very knowledgeable. We expressed what we liked and our concerns with the deer & bunnies and the Greenhouse staff knew exactly what to use for our flower beds and landscaping. They provided us with beautiful blooming plants from spring well into fall and we didn't have any problems with the animals. They guarantee their work and plants and followed up with us by phone and a visit. It was well worth it to have the Greenhouse complete these projects for us and we would highly recommend them.

Design & Inspiration

On-site Consultations

Site review, soil samples, moving and dividing plants, ideas and planning.

Master Plans

Measurements, complete plan, before and after images, quotes & plant information.

Installation

Complete garden installations, foundation plantings, borders, edging and hedges.

Custom Design

Sustainable landscapes, prairies, perennial beds. Designing gardens for your lifestyle.

Maintenance

Spring and fall clean up, fertilizing and soil amendments, mulching, pruning and more...

 **Winter
Greenhouse**
growing with you... Since 1984

Creating a Landscape

Why Landscaping?

Plants have a powerful effect on people. We love their colors, their fragrance and textures, the way they move in the wind, their fruits and flowers and the birds and insects they attract. Taking care of them is healthy, relaxing, and enjoyable, and it can also be rewarding.

Landscaping is one of the few improvements that adds more value to a property than it costs to install. It can add between 7 and 15 percent to a home's value, and a mature tree can often have an appraised value of between \$1000 and \$10,000.

Landscaping can also provide practical low-cost solutions to a number of site problems. Plants can control dust, prevent soil erosion, block the wind, provide shade, save energy, minimize sound and increase privacy. They can also increase the 'usability' of your yard, and provide an opportunity to set your home apart as you view it from the outside.

Whether you are considering a large project, need a hand cleaning up in the fall or help diagnosing a problem, Winter Greenhouse is here to help you get the job done.

The Process

The planning process for a larger project begins with gathering as much information as possible about the site and about your particular needs and wishes. It is helpful to fill out a questionnaire and draw in your measurements on a site plan before the meeting. These can be picked up at the Greenhouse or found on our web-site. Then we arrange a visit with you at your place and look over the areas you would like us to work on. We take photos and measurements, then make computer-aided drawings and images to fit the situation. Most people are happy for the before and after images of their sites, as it helps greatly to be able to visualize the final results. Finally we arrange a consultation at the greenhouse to go over the plan and images as well as present the quotes for the plants, materials, and installation, if that is wanted.

What does it cost?

We have 3 basic plans you can to choose from.

\$110 for a Greenhouse Consultation

You bring in measurements and images and we work on it at the greenhouse without an on-site visit. This design option is for a small to medium size area. For instance - one side of your house.

\$199 for an On-Site Medium Area Plan

We will come to your house and take the measurements and images we need. This design option is for a small to medium size area. For instance - one side of your house.

\$379 for an On-Site Master Plan

We will come to your house and take the measurements and the images we need. This design option is for all 4 sides of you house or an equivalent of 4 photo shots.

Please note: prices could vary according to the extent of the areas we are dealing with. We charge an additional travel charge of \$1.50 per mile (one way) when we come out for an on-site consultation.

For any other service including plant delivery, installing, spring and fall clean up, soil test etc., we charge \$40 an hour including the travel time. No extra mileage fee is added.

Our landscape projects include:

All our trees and shrubs have a 100% replacement guarantee for one year from the date of installation. For any jobs we install, we offer a 10% discount on all plant material.

We follow each job up with a visit later in the year, or the following year, to make sure you are completely satisfied with the results.

Quick sketch

We are also happy to help you at the Greenhouse **free of charge** with designing a smaller area. Appointments are not required, but may save you some inconvenience if we are occupied when you visit. You will walk away with a hand drawn quick sketch of the area in question, along with a list of the plants, soil amendments etc., that you will need.
